

Anacortes:

Adjust weight limits up

Oak Harbor:

Discuss by laws regarding field monitors and chain gang.

Excerpt From the NCYFL Handbook:

6.10 Any of the following violations of Field Monitor rules found by the NCYFL President or Vice Presidents on game day at any site will automatically incur a \$300.00 fine;

--6.10.1 1 or less Field Monitor is present

--6.10.2 Field Monitor(s) assigned does not have knowledge of job responsibilities

--6.10.3 Field Monitors do not have a rule book, NCYFL Handbook or Game Summary Sheet

--6.10.4 Field Monitors are allowing NCYFL rule violations of any type (i.e. allowing an overweight player to participate)

From the table of Game Day Personnel Responsibilities:

Each team will provide a field monitor regardless of being home or away. Home monitor will act as the site deputy and manage weigh-ins and official game-day sheet.

Also talk about draft procedures and some concerns

Stanwood:

1. **Raising the weight waiver restrictions at each division from 10% to 15%.** This would strictly be for players that play between the tackles.
2. **Proposing a 1 time weigh in at the Jamboree.** If a player is added to the roster later in the season, they would need to meet the same weight restrictions. A player is not going to gain a huge amount of weight or lose a huge amount of weight after the season begins. The whole process of weighing in players every week seems like we not encouraging the players to be healthy. They are trying to diet and starve themselves to make a special set weight. Let's set it and be done. If the player does not make the weight waiver, they can choose at that time to move up an age division or not play that season.

South Whidbey:

--PLAYER LOCATION

South Whidbey proposes the following: If you live in a city that is not supported by a youth team then the player has the choice to play for the next adjacent city. The player will not be allowed to jump around from city to city to find the best location to play. This will help the smaller cities and it will help with insure there is no recruitment.

- A. If you live in a city like Darrington that may not be able to field one of the following teams (pee wee/midget/junior or senior team) then the player would be allowed to play for Concrete but not Mount Vernon or any other city.
- B. If you live in Coupeville (this city does not have a youth football program) then the player would have the choice to play for either South Whidbey or Oak Harbor since Coupeville is located in the middle of these two programs.

--Divisional breakdown for 2014 season:

South Whidbey proposes to go back to the Mountain and Valley Divisions from the 2012 season. With the below additions/changes:

1. If a valley division as a minimum of 5 teams then you would play each team twice, once away and once home. This would result in an 8 game season and the top 4 teams would go to the playoffs for that division.
2. If a valley division has more than 5 teams then you would play each team at least once, have 1 bye and then have a cross over game/games with a mountain division team to make up a 7 game season. The cross over games would not affect this division's playoff standings for either division.
3. If a valley division team only has 4 teams total, then you would play each team twice for a total of 6 divisional games, 1 bye and then 1 out of division game against a mountain team given you an 8 week season.
4. If any division has less than 4 teams then there would be on division of Mountain/Valley and all teams would be put in 1 division. The NCYFL would do its best when scheduling games to ensure that the smaller cities are then

matched with smaller cities. This would be done to give the smaller cities/programs the chance to prevail during a game against one another during the season.

5. Senior teams would only have 1 division like in years past.
6. If the Pee Wee division only has a total of 4 teams then, that would be okay for a Pee Wee division since a Pee Wee season is only based on a 6 game season and everyone would go to the playoffs.
